New Insights into Hypertension and the Cardiovascular System

Message from the Guest Editor

Cardiovascular diseases are one of the leading causes of death worldwide. The primary prevention of cardiovascular diseases has become a main goal to promote public health. Hypertension is a risk factor for cardiovascular diseases and is possibly the most powerful, modifiable risk factor for the development of cardiovascular diseases. Early detection and appropriate management are necessary to prevent both heart failure and cardiovascular diseases. Oxidative stress and chronic inflammation have been identified as being potentially responsible for the development of endothelial damage and vascular stiffness, which are two of the primum movens of hypertension and cardiovascular diseases. However, mechanisms, pathogenesis, sympathetic neural activity, risk factors, and differences in race/ethnicity have not been verified in hypertension-related cardiovascular disease. In this Special Issue, we emphasize the importance of the management and treatment of hypertension in the prevention of cardiovascular diseases and welcome all types of manuscripts (original articles and review articles).

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
