Abdominal Surgery: Innovative Techniques and Challenges

Message from the Guest Editors

Abdominal surgery remains a cornerstone of general and specialized surgical care. In recent decades, the field has witnessed the steady integration of minimally invasive and robotic-assisted techniques, which have enhanced patient outcomes in terms of safety, recovery, and complication rates. Despite this progress, challenges remain in optimizing surgical decision-making, managing complex clinical cases, and standardizing care. This Special Issue, entitled “Abdominal Surgery: Innovative Techniques and Challenges”, invites high-quality submissions. We welcome the submission of original research articles, clinical trials, and systematic reviews (+/- meta-analyses). Particular emphasis will be placed on evidence-based practices that improve patient safety and outcomes, including enhanced recovery protocols, surgical education, and the multidisciplinary management of surgical disease. Submissions that evaluate the role of technology are also welcome to be submitted. This Special Issue seeks to bring together the expertise of abdominal surgeons and multidisciplinary teams to advance the field through evaluation and the dissemination of clinically relevant innovations.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
