New Advances in Abdominal Aortic Aneurysm

Message from the Guest Editors

Abdominal aortic aneurysm (AAA) is a “silent” disease which, if left untreated, leads to high mortality. Newer minimally invasive endovascular technologies have been introduced in recent decades as an alternative treatment option to open repair, reducing hospitalization and cardiovascular morbidities. The continued evolution of stent graft technology has succeeded in managing not only infrarenal AAA, but also complex abdominal aortic pathologies (pararenal and suprarenal aneurysms) with acceptable peri-operative and post-operative results. This Special Issue focuses on new advances in the therapy of AAA including standard, branched, and fenestrated endografts and forming dedicated vascular centers. It is my hope that this Special Issue will present and analyze all the latest endovascular advances in the treatment of abdominal aortic aneurysm.

Guest Editors

Dr. Konstantinos Tigkiropoulos

Vascular Division, 1st Surgical Department, Aristotle University, Thessaloniki, Greece

Prof. Dr. Nikolaos Saratzis

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
