

## Special Issue

# Recent Advances in Lymphoedema Research

### Message from the Guest Editors

Lymphoedema remains a complex and challenging condition, often resistant to traditional treatments. With our deepening understanding of this disease, surgical interventions have become increasingly vital, especially for patients who have exhausted conservative options. Recent breakthroughs in microsurgery, supermicrosurgery, and lymphaticovenular anastomosis are transforming patient care, offering new possibilities for improved outcomes and an enhanced quality of life. In this Special Issue, we aim to gather pioneering research and clinical insights that push the boundaries of what is possible in lymphoedema treatment. This issue will explore the latest surgical techniques, their practical applications, and their integration into comprehensive care plans, with a particular interest in studies addressing patient selection, perioperative strategies, and long-term outcomes.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
