Anti-pandemic: Search for New Therapeutics from the Natural Kingdom and Laboratory

Message from the Guest Editor

Dear Colleagues: The new coronavirus (COVID-19) infection has seriously affected our daily life. At present, there is no specific drug for this virus, and vaccine production is not yet ready. Therefore, existing antiviral drugs and traditional Chinese medicines are being tested for their antiviral potential. This Special Issue calls for reviews and original articles on the current status of specific drug development, the possibly efficacy of existing and newly synthesized antiviral drugs, and search of nonspecific antiviral substances from natural resources.

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within PubMed, PMC, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 28.6 days after submission; acceptance to publication is undertaken in 6.6 days (median values for papers published in this journal in the second half of 2024).
