Deadline for manuscript submissions:

28 February 2025

Message from the Guest Editors

Dear Colleagues,

Over the years, polymeric membrane technology has received significant attention due to its advantages, such as ease of operation, energy saving capability, compact size, environmental friendliness, and multiple applications. Polymeric membranes can be prepared by a wide variety of techniques and with several configurations depending on their applications. The development of new polymeric materials and the growing number of applications demands the development of better-suited membranes with different characteristics or new composite membranes and methods of preparation, as well as new functionalization methods.

This Special Issue will highlight the most recent and applicable achievements regarding the preparation, modification, and performance of polymeric membranes for water treatment, energy savings and /or energy storage, gas separation, and membranes for biomedical applications.

Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375).

Membranes is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Chemistry, Physical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
