## Modeling, Simulation and Application of Membrane Processes for Water Treatment 2.0

Guest Editors:

### Dr. Alejandro Ruiz García

Department of Electronic Engineering and Automation, University of Las Palmas de Gran Canaria, 35017 Las Palmas de Gran Canaria, Canary Islands, Spain

### Dr. Mudhar Al-Obaidi

Technical Institute of Baquba, Middle Technical University, Baquba 32001, Iraq

### Message from the Guest Editors

This Special Issue on "Modeling and Simulations of Membrane Processes for Water Treatment 2.0" aims to gather the foremost developments in methodologies, algorithms and advanced computer-aided tools to enhance water treatment systems. Modeling and simulation approaches embracing modelling of phenomena and simulation algorithm and methods that allow analyzing the response of systems, optimal system designs and operation. Manuscripts related to the above are welcomed to address the most challenging problems faced by the water industry today. Topics include, but are not limited to:

Deadline for manuscript submissions:

**closed (30 September 2023)**

- Water treatment powered by renewable energy
- Water–energy nexus
- Desalination systems
- Urban and industrial wastewater treatment
- Hybrid membrane processes for water treatment
- Transport and process modelling in water treatment
- Optimal operation of membrane processes for water treatment
- Fouling and scaling in membrane processes for water treatment
- Control of membrane processes in water treatment

## Editor-in-Chief

### Prof. Dr. Spas D. Kolev

School of Chemistry, The  
University of Melbourne,  
Melbourne, VIC 3010, Australia

## Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375).

*Membranes* is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Chemistry, Physical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
