School of Chemistry and Chemical Engineering, Shandong University of Technology, Zibo 255000, China

Prof. Dr. Xianhui Li
School of Ecology, Environment and Resources, Guangdong University of Technology, Guangzhou 510006, China

Dr. Nozipho N Gumbi
Institute for Nanotechnology and Water Sustainability (iNanoWS), College of Science, Engineering and Technology, University of South Africa, Johannesburg 1709, South Africa

Deadline for manuscript submissions:
closed (31 May 2024)

Message from the Guest Editors

Dear Colleagues,

We are delighted to present this Special Issue of *Membranes* dedicated to the exploration of cutting-edge developments in the field of polymer membrane formation. Membrane technology plays a pivotal role in various industrial processes, including water purification, gas separation, drug delivery, and beyond. Polymer membranes have emerged as versatile materials with a wide range of applications due to their tunable properties, cost-effectiveness, and sustainability. This Special Issue, entitled "Advances in Polymer Membrane Formation", showcases the latest breakthroughs and innovations in this critical area of materials and separation science.

School of Chemistry, The University of Melbourne, Melbourne, VIC 3010, Australia

Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375).

Membranes is an international, peer-reviewed open accessjournal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.
Journal Rank: JCR - Q2 (*Chemistry, Physical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
