Deadline for manuscript submissions:

closed (30 September 2023)

Message from the Guest Editors

Dear Colleagues,

The role of biological membranes in maintaining cell homeostasis and their involvement in cellular functions makes these structures potential targets for drug action. However, in order to design new and better drugs it is necessary to have a comprehensive physicochemical and biological knowledge of the processes that occur in membrane regions. This Special Issue is devoted to state-of-the-art research on topics concerning the use of membranes in biophysics, medicinal chemistry, and pharmacology, including multidisciplinary studies. This covers all aspects associated with the interactions between chemical compounds and membranes, including their lipid, protein, and carbohydrate components. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: chemistry, (micro)biology, biochemistry, chemical biology, material sciences, physics, and engineering.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375).

Membranes is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Chemistry, Physical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
