Membranes for Tissue Engineering and Clinical Applications

Guest Editors:

Prof. Dr. Po-Chun Chang

Graduate Institute of Clinical Dentistry, School of Dentistry, College of Medicine, National Taiwan University, Taipei, Taiwan

Prof. Dr. Ming-Hua Ho

Department of Chemical Engineering, College of Engineering, National Taiwan University of Science and Technology, Taipei 10607, Taiwan

Deadline for manuscript submissions:

closed (31 July 2022)

Message from the Guest Editors

In this Special Issue, we aim to focus on the latest developments of membrane systems for tissue engineering applications and clinical validations of the membrane-based approaches. Potential topics include but are not limited to the following:

- Advanced technologies in membrane manufacturing or characterization;
- Membranes for drug or biomolecule delivery;
- Naturally derived membranes (e.g., amniotic membrane) for biomedical application;
- Functionalization or modification on the available membranes;
- Bioprinted or cell-laden membranes;
- Cell–membrane or tissue–membrane interactions;
- Barrier membranes for guided tissue/bone regeneration;
- Bioengineered constructs for regenerating membranous structures (e.g., tympanic membrane, retina, and cornea).

Editor-in-Chief

Prof. Dr. Spas D. Kolev

School of Chemistry, The
University of Melbourne,
Melbourne, VIC 3010, Australia

Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375).

Membranes is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Chemistry, Physical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
