## Polymer Inclusion Membranes, Adapted and Efficient Tools for a Green and Sustainable Chemistry

Guest Editors:

**Prof. Dr. Miloudi Hlaïbi**

Laboratoire Génie des Matériaux pour Environnement et Valorisation (GeMEV), Faculté des sciences Aïn Chock, Université Hassan II Casablanca, Casablanca 20000, Morocco

**Prof. Dr. Laurent Lebrun**

Laboratory PBS, UMR CNRS 6270, University of Rouen Normandy, Blv De Broglie, 76821 Mont-Saint-Aignan CEDEX, France

**Prof. Dr. Stéphane Marais**

Laboratoire PBS-UMR 6270 CNRS-INSA, Université de Rouen, Bâtiment Pierre-Louis Dulong, Boulevard Maurice de Broglie, 76000 Rouen, France

Deadline for manuscript submissions:

**closed (31 December 2021)**

### Message from the Guest Editors

Dear Colleagues,

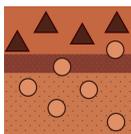

This Special Issue is dedicated to polymer inclusion membranes, which are performant tools for facilitated extraction oriented processes. Manuscripts with themes oriented towards different environmental applications, will be reviewed for publication in this Special Issue. In particular, the treatment of effluents contaminated by organic pollutants or toxic metal ions, the improvement of industrial processes for better, clean, and efficient production and the valorization of industrial and agricultural waste rich in value-added compounds. Papers that report the influence of the temperature factor on the performance of membranes and describe the mechanisms of the processes carried out will have a special treatment.

After this Special Issue, a conference will be organized by the Guest Editors and sponsored by the *Membranes* journal around the themes treated and published in this issue and more precisely in the fields of development, characterization, and applications of PIMs membranes. Benefits for participating in this event will be granted to authors who have published work in this Special Issue.

University of Melbourne,  
Melbourne, VIC 3010, Australia

## Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375).

*Membranes* is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Chemistry, Physical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
