### Message from the Guest Editor

Dear Colleagues,

This Special Issue entitled “UF/NF/RO membranes for wastewater treatment and reuse” focuses on treatment of wastewaters with pressure membrane separation processes (ultrafiltration/nanofiltration/reverse osmosis). Our focus is also on pretreatments for membrane separation processes to decrease fouling. Important aspects of the Special Issue include treatment and reuse of various wastewaters (model and real).

The Issue accepts high-quality research articles as well as review articles. Given your insightful works in the field, we invite you and your colleagues to submit a contribution to this Special Issue in which some leading experts will describe works, ideas, and findings.

## Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375).

*Membranes* is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Chemistry, Physical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
