Message from the Guest Editor

Dear Colleagues,

This Special Issue is aimed to overview the known lipid-binding protein domains or any other molecules that manipulate lipids for cellular functions. The topic will include the structural aspect of lipid recognition by any molecules including proteins, the various ways to recognize the membrane lipids by specific molecules, and the various ways to manipulate the morphology of the lipids by the molecule-molecule interactions. The nature of lipids for such cellular functions might also be reviewed.

Shiro Suetsugu

Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375).

Membranes is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Polymer Science) / CiteScore - Q1 (Chemical Engineering (miscellaneous))
