

Special Issue

Membranes Young Investigators' Contributions Collection

Message from the Guest Editors

Membranes aims to compile the current trends and research directions of internationally renowned and successful young membrane scientists in one dedicated Special Issue. The idea for this Special Issue has arisen from the numerous and, above all, brilliant nominations for *2021 Young Investigator Award*. In this Special Issue, we invite young investigators to submit manuscripts describing their ongoing research in this exciting field of membrane science. Young researchers are expected to lead the publications derived from their research, either as a first or corresponding author, regardless of whether they are in the early stages of their research careers (undergraduate, graduate, Master, and PhD students) or intermediate stage (postdoctoral researchers or junior group leaders), as long as they meet the requirement of being under 40 years old. Manuscripts covering original research as well as review articles, short communications, and perspective articles are acceptable for submission. With this new initiative, we wish to strengthen the networking of young researchers, paving the way to later stages of their research careers.

Guest Editors

Dr. Clàudia Fontàs
Prof. Dr. Spas D. Kolev
Dr. Edward A. Nagul
Prof. Dr. Yingchao Dong

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375). *Membranes* is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Spas D. Kolev
School of Chemistry, The University of Melbourne, Melbourne, VIC

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Polymer Science) / CiteScore - Q1 (Chemical Engineering (miscellaneous))
