

Environmental Metabolites Insights into Health and Disease

Guest Editor:

Prof. Dr. Yu Sun

College of Life Sciences, South
China Agricultural University,
Guangzhou, China

Deadline for manuscript
submissions:

28 February 2025

Message from the Guest Editor

This Special Issue aims to explore the complex interactions between environmental metabolites and their impacts on both human and animal health. Environmental metabolites encompass a wide range of chemical compounds resulting from environmental exposures, including both harmful toxins and beneficial protectants. Understanding these metabolites is crucial for elucidating the mechanisms through which environmental factors influence health outcomes in humans and animals.

We encourage submissions that offer novel insights and advance the field of environmental metabolomics, paving the way for future research and applications in health and disease prevention in both humans and animals. Molecular mechanistic research within this topic is particularly welcome, as it can provide detailed insights into the biological processes affected by environmental metabolites.

Dr. Amedeo Lonardo

1. Formerly Director of the Simple Operating Unit "Metabolic Syndrome", Azienda Ospedaliero-Universitaria, 41126 Modena, Italy
2. Formerly Professor of Internal Medicine, School of Specialization of Allergology and Clinical Immunology, University of Modena and Reggio Emilia, 41121 Modena, Italy

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biochemistry and Molecular Biology*) / CiteScore - Q2 (*Endocrinology, Diabetes and Metabolism*)
