

Cancer Metabolomics 2024

Guest Editor:

Dr. Bénédicte Elena-Herrmann

Institute for Advanced
Biosciences, University Grenoble
Alpes/CNRS/INSERM, Grenoble,
France

Deadline for manuscript
submissions:

25 February 2025

Message from the Guest Editor

We welcome the submission of original research articles or review papers as contributions to this Special Issue of *Metabolites* dedicated to Cancer Metabolomics.

The aim for this issue is to highlight innovative metabolomic approaches for fundamental and clinical research in cancerology. These include new achievements in metabolomics research in oncology that provide mechanistic information on model systems or involve translational and clinical studies on cancer patients.

We encourage contributions that include cross-disciplinary research, large-scale data collection and analysis, or multi-omics studies for integrative medicine. Investigations of metabolic markers of risk, early markers of disease, and prognostic metabolites markers of the evolution of responses to cancer treatment will be highly relevant contributions to this Special Issue. New approaches based on mass spectrometry or nuclear magnetic resonance (NMR), as well as broader technological and analytical developments leading to future advances in the field of cancer metabolomics, are also very welcome.

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Amedeo Lonardo

1. Formerly Director of the Simple Operating Unit "Metabolic Syndrome", Azienda Ospedaliero-Universitaria, 41126 Modena, Italy
2. Formerly Professor of Internal Medicine, School of Specialization of Allergology and Clinical Immunology, University of Modena and Reggio Emilia, 41121 Modena, Italy

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biochemistry & Molecular Biology*) / CiteScore - Q2 (*Endocrinology, Diabetes and Metabolism*)
