## The UC Davis West Coast Metabolomics Center Collection: From Compound Identification to Discoveries in Metabolism

Guest Editor:

**Prof. Dr. Oliver Fiehn**

West Coast Metabolomics Center,  
University of California, 451  
Health Sciences Drive, Davis, CA  
95616, USA

Deadline for manuscript  
submissions:

**closed (17 August 2023)**

### Message from the Guest Editor

The West Coast Metabolomics Center (WCMC) conducts more than 300 studies per year on many different projects. Collaborating laboratories focus on biology (Taha, Hammock), human nutrition and method development (Newman), and cheminformatics (Fiehn). Formally instituted in 2012, the WCMC has now matured. We here invite papers on research products that have been performed in collaboration with the WCMC faculty members or using the WCMC service core for data acquisition. We will highlight the many facets of our research, covering method development, informatics and basic biology, or biomedical applications. Topic areas range from fundamentals in compound identification to data normalization, statistics, to various applications in biology and biomedicine. Applications include studies on human glioblastoma, sexual dimorphisms of mouse knockouts, gut microbiome studies and others. Submission of manuscripts focusing on the function and regulation of lipids are especially welcome.

# Special Issue

an Open Access Journal by MDPI

## Editor-in-Chief

### Dr. Amedeo Lonardo

1. Formerly Director of the Simple Operating Unit "Metabolic Syndrome", Azienda Ospedaliero-Universitaria, 41126 Modena, Italy  
2. Formerly Professor of Internal Medicine, School of Specialization of Allergology and Clinical Immunology, University of Modena and Reggio Emilia, 41121 Modena, Italy

## Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Biochemistry and Molecular Biology*) / CiteScore - Q2 (*Endocrinology, Diabetes and Metabolism*)
