## Determination and Analysis of Known and Unknown Metabolites in NMR-Based Metabolomics

Guest Editors:

**Dr. Cheng Wang**

Department of Biostatistics,  
School of Public Health, Cheeloo  
College of Medicine, Shandong  
University, Jinan 250002, China

**Prof. Dr. Donghai Lin**

Department of Chemical Biology,  
College of Chemistry and  
Chemical Engineering, Xiamen  
University, Xiamen 361005, China

### Message from the Guest Editors

This Special Issue of *Metabolites*, “Determination and Analysis of Known and Unknown Metabolites in NMR-Based Metabolomics”, will be dedicated to publishing a wide range of methods and applications of NMR-Based Metabolomics to various research fields with an emphasis on improving the performance of the determination and analysis of known and unknown metabolites. Highly desired researches also include those on experimental and computational approaches to improve the identification and analysis of known and unknown metabolites using hybrid LC-MS/NMR methods.

Deadline for manuscript  
submissions:

**closed (20 October 2023)**

## Editor-in-Chief

### Dr. Amedeo Lonardo

1. Formerly Director of the Simple Operating Unit "Metabolic Syndrome", Azienda Ospedaliero-Universitaria, 41126 Modena, Italy  
2. Formerly Professor of Internal Medicine, School of Specialization of Allergology and Clinical Immunology, University of Modena and Reggio Emilia, 41121 Modena, Italy

## Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Biochemistry and Molecular Biology*) / CiteScore - Q2 (*Endocrinology, Diabetes and Metabolism*)
