Lipid Biomarkers and Cardiometabolic Diseases

Guest Editor:

Prof. Dr. Hyun Suk Yang
Department of Cardiovascular Medicine, Konkuk University School of Medicine, Konkuk University Medical Center, Seoul, Republic of Korea

Deadline for manuscript submissions:
closed (30 September 2024)

Message from the Guest Editor

This Special Issue aims to provide a comprehensive understanding of the role of lipid biomarkers in cardiometabolic diseases. By investigating the lipid metabolism and impacts of dietary factors and analyzing advanced lipid profiles, this research will contribute valuable insights into the prevention, diagnosis, and treatment of cardiometabolic diseases. Authors are encouraged to contribute their research findings to further enrich the understanding of lipid biomarkers and their implications in cardiometabolic health.

Special Issue

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q2 (Endocrinology, Diabetes and Metabolism)
