Disciplines, Faculty of Medicine  
and Pharmacy, University of  
Oradea, 410073 Oradea, Romania

**Prof. Dr. Dana Zaha**

Department of Preclinical  
Disciplines, Faculty of Medicine  
and Pharmacy, University of  
Oradea, 410073 Oradea, Romania

Deadline for manuscript  
submissions:

**15 November 2024**

### Message from the Guest Editors

Dear Colleagues,

This Special Issue is a continuation of our previous Special Issue, “Research Progress of Plant Compounds for Diabetes and Its Complications”.

Diabetes mellitus is a chronic condition where numerous complications appear that affect nerve function, eye function, renal function, or lead to atherosclerosis. Plant compounds have proven to be beneficial in reducing the intensity of all the pathogenic mechanisms involved in the apparition of these complications. The general beneficial effects of plant compounds, such as their anti-oxidant or anti-inflammatory roles, are well known; however, numerous plant extracts and plant compounds have not been explored yet, and numerous compounds are discovered daily.

We believe that this Special Issue will serve researchers as a way to publish their results in plant extracts, plant compounds, or plant compound metabolites generated after certain plant supplement administration in diabetes mellitus or its complications.

## Editor-in-Chief

### Dr. Amedeo Lonardo

1. Formerly Director of the Simple Operating Unit "Metabolic Syndrome", Azienda Ospedaliero-Universitaria, 41126 Modena, Italy  
2. Formerly Professor of Internal Medicine, School of Specialization of Allergology and Clinical Immunology, University of Modena and Reggio Emilia, 41121 Modena, Italy

## Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Biochemistry and Molecular Biology*) / CiteScore - Q2 (*Endocrinology, Diabetes and Metabolism*)
