Deadline for manuscript
submissions:

closed (21 January 2020)

Message from the Guest Editor

Dear Colleagues,

Over the years, numerous studies have demonstrated the application of metabolomics for systems biology, biomarker discovery, precision medicine, and for assessing the impact of environmental exposures on human health. This special issue of “Computational Metabolomics” will be dedicated to review the advancements in the application of chemometrics, bioinformatics, and data science techniques for metabolomics data processing, annotation, pathway and network analysis, biomarker discovery, and integration of metabolomics data with other omics, experimental, and biomedical data. Articles focused on the current challenges and recommendations related to metabolomics/lipidomics data analysis, as well as on enhancing reproducibility and harmonization, are also highly desired.

Dr. Karan Uppal

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Amedeo Lonardo

1. Formerly Director of the Simple Operating Unit "Metabolic Syndrome", Azienda Ospedaliero-Universitaria, 41126 Modena, Italy
2. Formerly Professor of Internal Medicine, School of Specialization of Allergology and Clinical Immunology, University of Modena and Reggio Emilia, 41121 Modena, Italy

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biochemistry and Molecular Biology*) / CiteScore - Q2 (*Endocrinology, Diabetes and Metabolism*)
