Deadline for manuscript
submissions:

closed (30 April 2021)

Message from the Guest Editor

Dear Colleagues,

Plants are routinely exposed to abiotic/biotic stress factors, and, as sessile organisms, must develop different strategies to cope with this multitude of natural environmental conditions. Mass spectrometry (MS)-based analytical tools are the most widely used in plant metabolomics applications to investigate the molecular and biochemical mechanisms that underlie plant responses to changing environments.

This Special Issue of *Metabolites* "Metabolomics to Elucidate the Metabolic Mechanisms of Plant Responses to Variable Environmental Stresses" invites manuscripts on such mechanisms in flexible aspects of plant biology. Ultimately, the knowledge provided would facilitate our understanding of how environmental stresses, single or combined, activate and coordinate different metabolic pathways to ensure plant adaptation and survival. Manuscripts on novel plant sample preparation techniques, MS-based analytical methods to identify/quantify key signaling metabolites, as well as bioinformatics tools and other technical improvements, are welcome in this Special Issue.

Dr. Amedeo Lonardo

1. Formerly Director of the Simple Operating Unit "Metabolic Syndrome", Azienda Ospedaliero-Universitaria, 41126 Modena, Italy
2. Formerly Professor of Internal Medicine, School of Specialization of Allergology and Clinical Immunology, University of Modena and Reggio Emilia, 41121 Modena, Italy

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biochemistry and Molecular Biology*) / CiteScore - Q2 (*Endocrinology, Diabetes and Metabolism*)
