Materials, Northeastern  
University at Qinhuangdao,  
Qinhuangdao 066004, China

Deadline for manuscript  
submissions:

**closed (30 June 2023)**

### Message from the Guest Editor

Dear Colleagues,

Rare earth elements are an important part of modern high-tech new materials such as permanent magnet materials, polishing materials, catalytic materials, etc., and have become an important strategic resource in the world. With the large-scale use of rare earth elements, the discharge of secondary resources such as residuals and scrapped products will not only endanger the environment and human health, but also be a waste of resources. At present, the recovery of rare earth elements from secondary resources is in the primary stage of research, and it is of great scientific significance to develop a green process for the recovery of rare earth elements.

This special issue will be devoted to collecting papers on the recent green processes and methods for recovering rare earth elements from different secondary resources.

Dr. Wenning Mu  
*Guest Editor*

## Editors-in-Chief

### Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

### Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

## Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Metallurgy and Metallurgical Engineering*) / CiteScore - Q1 (Metals and Alloys)
