Message from the Guest Editors

Dear Colleagues,

Powder metallurgy method is one key technique in the fabrication of advanced materials, including metals, ceramics, composites, etc. In order to build upon the advances in this method and its application, we are working hard to invite famous materials scientists to contribute excellent research works on synthesis procedure, machining technique, microstructure configuration, and the tailoring of properties. In addition, it has been confirmed that inclusion in the present journal will generate attention for the works published there. The present research hot points of nano materials, super materials, 3D printing, energy materials, and environment materials etc. are strongly welcomed.

Prof. Dr. Pasquale Cavaliere

Prof. Dr. Chunfeng Hu

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Metallurgy and Metallurgical Engineering*) / CiteScore - Q1 (Metals and Alloys)
