Message from the Guest Editors

Dear Colleagues,

Reducing carbon emissions from the steel industry is vital for achieving the strategic goals of carbon peak and carbon neutrality. Steelmaking is an important link in the metallurgical process of iron and steel, and it is necessary to carry out relative technical innovation in order to reduce carbon emissions from steelmaking processes. Currently, converter steelmaking and electric arc furnace steelmaking are the main steelmaking methods and in recent years, many green and intelligent steelmaking technologies have been proposed and developed, especially in slag utilization, process optimization, green electric steelmaking, intelligent smelting and so on.

Deadline for manuscript submissions:
20 November 2024

Editors-in-Chief

Prof. Dr. Hugo F. Lopez
Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang
Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (*Metallurgy and Metallurgical Engineering*) / CiteScore - Q1 (Metals and Alloys)
