**Dr. Theodore E. Matikas**

Mechanics, Smart Sensors and Nondestructive Evaluation (MSS-NDE) Laboratory, Department of Materials Science and Engineering, University of Ioannina, Ioannina, Greece

Deadline for manuscript submissions:

**closed (31 March 2024)**

### Message from the Guest Editors

This Special Issue seeks contributions that address the comparative analysis of fatigue behavior between superalloys and CMCs under extreme conditions. We encourage original research articles, reviews, and case studies that encompass a wide range of topics, including, but not limited to, the following:

- Experimental investigations and observations of fatigue behavior in superalloys and CMCs;
- Analytical modeling and simulation techniques to assess fatigue life and predict failure probability;
- Anisotropic modeling approaches accounting for the orientation characteristics of single crystals;
- Progressive damage modeling for CMCs, considering material processing and manufacturing defects;
- Applications and case studies in aerospace, defense, automotive, energy and power, and electrical and electronics industries;
- Advanced non-destructive evaluation (NDE) techniques for fault identification and characterization;
- Comparative studies on the performance and durability of superalloys and CMCs under extreme conditions.

## Editors-in-Chief

### Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

### Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

## Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Metallurgy and Metallurgical Engineering*) / CiteScore - Q1 (Metals and Alloys)
