Message from the Guest Editor

Dear Colleagues,

Nanoporous metallic materials have emerged as a fascinating class of functional materials with diverse applications across various fields, including catalysis, energy storage, sensing, and biomedical engineering. The unique combination of high surface area, tunable pore size, and exceptional mechanical properties has spurred significant interest in understanding and manipulating their mechanical behavior. This Special Issue aims to showcase the latest advancements and discoveries in this rapidly evolving research area and to develop a set of structure–activity relationships between microstructure, mechanical properties, and deformation mechanisms through the exploration of the mechanical behavior of nanoporous metals, which is expected to provide important guidance for property prediction, structural orientation design, and functional optimization in practical applications.

Special Issue

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Metallurgy and Metallurgical Engineering*) / CiteScore - Q1 (Metals and Alloys)
