closed (31 August 2023)

Message from the Guest Editor

Dear Colleagues,

When metallic alloys make contact with a corrosive environment, corrosion will inevitably occur, which affects their performance and service life and sometimes causes safety accidents and significant economic losses. Therefore, it is of great theoretical and practical significance to study the corrosion behavior and mechanisms of metallic alloys and establish reliable protective measures, such as corrosion inhibitors and coating.

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Metallurgy and Metallurgical Engineering*) / CiteScore - Q1 (Metals and Alloys)
