Chinese Academy of Sciences,  
Shenyang 110016, China

**Dr. Shuang Gao**

School of Material Engineering,  
Shanghai University of  
Engineering Science, Shanghai  
201620, China

Deadline for manuscript  
submissions:

**closed (31 January 2024)**

### Message from the Guest Editors

Inconel alloys are the first choice for demanding applications in geothermal, nuclear, aerospace, ship building, and chemical processing industries, due to their fatigue strength, acid resistance, excellent resistance, high/low-temperature mechanical properties, and high-temperature oxidation resistance. The scope of the Special Issue on the advances in Inconel alloys includes the latest achievements in research and production, achievements in innovative scientific research, and the solutions of new challenges to Inconel alloys in the development of various fields.

In this Special Issue, we welcome articles that focus on alloy design, process development, component engineering, lifetime estimation, and material behavior. Research and technology worked to develop the basic understanding of their physical behavior and the more practical aspects required to efficiently maximize the benefits of Inconel alloys.

an Open Access Journal by MDPI

## Editors-in-Chief

### Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

### Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

## Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Metallurgy and Metallurgical Engineering*) / CiteScore - Q1 (Metals and Alloys)
