Deadline for manuscript submissions:

closed (29 February 2024)

Message from the Guest Editors

Dear Colleagues,

Laser processing and additive manufacturing are revolutionary techniques for the advanced manufacturing of a broad range of materials, especially metallic materials used in structural applications. This Special Issue aims to provide a platform for appreciating state-of-the-art advances, inspiring and promoting the new development and applications of laser processing and the additive manufacturing of metallic materials. Topics include but are not limited to the following areas:

- Laser welding;
- Laser cladding;
- Laser cutting;
- Laser-arc hybrid welding and additive manufacturing;
- Laser-based additive manufacturing;
- Wire arc additive manufacturing (WAAM);
- Electron beam-based additive manufacturing;
- Modelling and simulation of laser processing and additive manufacturing;
- AI and machine learning for laser processing and additive manufacturing;
- Monitoring and control of laser processing and additive manufacturing;
- Quality inspection of laser processing and additive manufacturing;
- Micro and nano laser welding and additive manufacturing.

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Metallurgy and Metallurgical Engineering*) / CiteScore - Q1 (Metals and Alloys)
