Electronic Engineering, Wuhan  
University of Technology, Wuhan  
430070, China

**Prof. Dr. Dahu Zhu**

School of Automotive  
Engineering, Wuhan University of  
Technology, Wuhan 430070,  
China

Deadline for manuscript  
submissions:

**closed (30 June 2023)**

### Message from the Guest Editors

Dear Colleagues,

It is a great honor and privilege to be involved as Guest Editors of a Special Issue of *Metals* focusing on “Advances in Machining Processes of Metallic Materials”. We are pleased to invite you to contribute a research paper or review to this Special Issue. We believe it will become a very important Special Issue with your support.

Metallic materials play a significant role in the development of modern science, industry, and technology. They have a broad range of applications in various engineering fields. Proper machining processes can lead to obtaining proper surface integrity and enhancing service performance. The scope of the Special Issue is to publish outstanding papers presenting advances in the field of machining processes of metallic materials.

Articles addressing all aspects of machining of metallic materials, including material processing, design and development of equipment and cutting tools, and the surface integrity of machining processes are welcome. Full papers, communications, and reviews are welcome for submission.

an Open Access Journal by MDPI

## Editors-in-Chief

### Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

### Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

## Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Metallurgy and Metallurgical Engineering*) / CiteScore - Q1 (Metals and Alloys)
