Message from the Guest Editors

Dear Colleagues,

This Special Issue covers research topics related to special materials for shipbuilding, aiming to have lightweight, safe and economical ship structures through their entire lifetime. We warmly invite papers on material manufacture, forming, as well as those on the mechanics of the ship structures made of various metals and composites. A rapid review process and open-access publication will be provided for the high-quality papers on the following topics:

- Metal manufacture techniques;
- Metal forming;
- Strength assessment of ship structures;
- Design and optimization of lightweight structures;
- Ultimate strength of plates, stiffened panels and hull girders;
- Fatigue strength and crack growth of joint structures;
- Impact strength of ship structures;
- Vibration and noise;
- Corrosion effect;
- Steel and aluminum alloy structures;
- Composite structures.

Message from the Editor-in-Chief

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compindex, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Metals and Alloys)
