

## Advances in Nanostructured Metallic Materials

Guest Editors:

**Prof. Dr. Marek Wojnicki**

Faculty of Non-Ferrous Metals,  
AGH University of Science and  
Technology, 30-059 Krakow,  
Poland

**Prof. Dr. Volker Hessel**

Faculty of Engineering, Computer  
and Mathematical Sciences,  
School of Chemical Engineering,  
University of Adelaide, Adelaide,  
SA 5005, Australia

**Dr. Marc Escribà-Gelonch**

Higher Polytechnic Engineering  
School, Department of  
Chemistry, University of Lleida,  
Pla de la Massa, 08700 Igualada,  
Barcelona

Deadline for manuscript  
submissions:

**closed (30 June 2024)**

### Message from the Guest Editors

Dear Colleagues,

The development of civilization is based on the development of metallurgy. Today, metals are an indispensable part of our daily life. However, pure metals or simple alloys are no longer able to meet our basic requirements. Therefore, we create metallic materials based on new properties resulting from their nanostructure. As part of the Special Issue on “Advances in Nanostructured Metallic Materials”, interdisciplinary works on nanostructured alloys as well as nanomaterials (nanoparticles), nanoalloys, thin films, and nanocomposites are published. I am honored to be invited to serve as a Guest Editor of the journal *Metals* for a Special Issue entitled “Advances in Nanostructured Metallic Materials”, providing academic exchange opportunities for colleagues from all over the world to support the research and industrialization of nanostructured metallic materials and nanocomposites.

an Open Access Journal by MDPI

## Editor-in-Chief

China

## Message from the Editor-in-Chief

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compindex, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Metals and Alloys)
