Sabatier, 118 Route de
Narbonne, F-31062 Toulouse
Cedex 9, France

Deadline for manuscript
submissions:

closed (31 January 2018)

Message from the Guest Editor

In powder metallurgy, synthesis and processing are two of the most important steps. Recent progress in the development of tailored powders to control the microstructure and properties of the final products for specific applications have been performed. Progress in mature technologies and advances in new technologies for the processing are depending on fine understanding of the chemical, physical and mechanical mechanisms driving the powder route. Modeling, both analytical and numerical, of these mechanisms and of their coupling is an essential step for the development of new materials with complex shapes and/or tailored properties.

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Metallurgy and Metallurgical Engineering*) / CiteScore - Q1 (Metals and Alloys)
