

## Corrosion Prediction in Different Environment

Guest Editors:

**Prof. Dr. Xiaobing Ma**

The Key Laboratory on Reliability and Environmental Engineering Technology, Beihang University, Beijing 100191, China

**Dr. Yikun Cai**

School of Aeronautics and Astronautics, Sichuan University, Chengdu 610017, China

Deadline for manuscript submissions:

**closed (30 September 2023)**

### Message from the Guest Editors

Corrosion prediction can provide valuable information for environment corrosivity classification and corrosion resistance evaluation of materials. Significant advances in this field have been achieved. However, the prediction accuracy is still not high due to the scatter of the data and the simplification of the model.

This Special Issue aims to collect the latest developments in the field, which can contribute to quantitative corrosion experiments, enrich environment and corrosion data, improve corrosion prediction accuracy, and enhance the understanding of the corrosion process. In this Special Issue, original research articles and reviews are welcome. Topics addressed may include, but are not limited to: Corrosion prediction in different environments; Corrosion test in atmospheric or marine field environments (especially long-term test or in extreme environments); Corrosion test in laboratory simulated or accelerated environment; Mechanism consistency and acceleration rate between laboratory and field environment; Corrosion monitoring or simulation; Degradation of anti-corrosion coatings; New equipment, sensors, methodology, tools, and models in corrosion.

an Open Access Journal by MDPI

## Editors-in-Chief

### Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

### Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

## Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Metallurgy and Metallurgical Engineering*) / CiteScore - Q1 (Metals and Alloys)
