Advances in Dissimilar Welding and Joining

Guest Editor:

Dr. Paolo Ferro

Department of Engineering and Management, University of Padova, Stradella San Nicola 3, 36100 Vicenza, Italy

Deadline for manuscript submissions:

closed (30 April 2023)

Message from the Guest Editor

I am very happy to inform you of the launch of a Special Issue named 'Advance in Dissimilar Welding and Joining' by the journal *Metals*. The need for joining dissimilar metallic materials is of primary importance in the design of components. This is because we are living in the era of multi-materials, where lightweight solutions or materials with enhanced mechanical and thermal properties are achieved by combinations of different materials and used in sectors such as the shipping, aviation, and automobile industries. The joining of dissimilar materials is very challenging, since mismatches between physical. chemical, thermal, and mechanical properties can tremendously impact the goal of obtaining a sound joint. This Special Issue aims to collect new advances in this research field. Therefore, due to your expertise in the field, I invite you to submit works focusing on the welding and joining of dissimilar metallic materials.

Editors-in-Chief

Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure - disciplines in metallurgical field the ranging from processing. and mechanical behavior. phase transitions microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Author Benefits

Open Access: free for readers, with <u>article processing charges (APC)</u> paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science),

Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Metallurgy and Metallurgical Engineering*) / CiteScore - Q1

(Metals and Alloys)
