Message from the Guest Editors

The present Special Issue on the topic of Intermetallics and Interstitials aims to consider the theoretical, experimental, application aspects of intermetallic and interstitial systems, all materials based on the combination of different types of metals (from light ones, such as alkaline, to the heaviest ones, such as actinides), or comprising light p-electron elements in minor amounts to generate unexpected and exceptional chemical, physical, and mechanical properties.

The present forum offering results of numerical simulation, of a wide panel of experimentations, and of recent achievements on integrated systems should easily demonstrate the forces and the extreme topicality of research and development activities undertaken all around the world during the second decade of the 21st century.

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Metallurgy and Metallurgical Engineering*) / CiteScore - Q1 (Metals and Alloys)
