

## Additive Manufacturing of Metallic Materials: Characterization, Properties, and Modeling

Guest Editors:

**Dr. Behzad Fotovvati**

Additive Manufacturing Institute of Science and Technology (AMIST), University of Louisville, Louisville, KY 40292, USA

**Dr. Praveen Sathiyamoorthi**

Indian Institute of Technology (BHU), Varanasi, India

**Dr. Gangaraju Manogna Karthik**

Department of Mechanical Engineering IIT, Indian Institute of Technology (BHU), Varanasi, India

Deadline for manuscript submissions:

**closed (31 March 2023)**

### Message from the Guest Editors

Additive manufacturing (AM) technologies are positioned to provide a disruptive transformation in how products are designed and manufactured. AM is based on adding materials layer-wise and scanning the part geometry using a moving heat source in a prescribed scan pattern. Understanding this variation and its correlation to material microstructure, defects, and temperature variations provides a better understanding of the metal AM processes and methods to improve them.

This Special Issue aims to collect the latest developments in the field, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Innovative AM technologies and process parameter optimization;
- AM process–geometry–property correlations;
- AM process modeling and simulation;
- Design, analysis, and additive manufacturing of porous metallic structures and scaffolds;
- Design and development of TRIP and TWIP alloys, high-entropy alloys, and precipitation-strengthened alloys by additive manufacturing;
- Mechanical and microstructural characterization of AM parts;
- Tensile properties, fatigue, fracture, and failure analysis of AM parts.

an Open Access Journal by MDPI

## Editors-in-Chief

### Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

### Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

## Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Metallurgy and Metallurgical Engineering*) / CiteScore - Q1 (Metals and Alloys)
