Unibertsitatea, Campus Bizkaia,
48940 Leioa, Spain

**Dr. Luis Pallarés-
Santasmartas**

Munabe College, Lauroeta
Etorbidea, 14. 48180 Loiu,
Bizkaia, Spain

Deadline for manuscript
submissions:

closed (31 January 2022)

Message from the Guest Editors

Dear Colleagues,

In this Special Issue, we aim to gather studies that focus on aspects that influence fatigue strength (both conventional fatigue limit and gigacycle fatigue strength) and the S-N curve and its shape. Studies on the influence of the processes of obtaining the material (composition, grain size, and subsequent thermal or surface treatments), manufacturing processes and later treatments (such as SP, LSP, LPB, and welding), additive manufacturing, residual stresses, and tribological parameters in the fatigue limit value are welcome. Studies on the use of time-varying stress values in fatigue design (cumulative damage) and the influence of mean tensile and compressive stresses (behavior models in the Haigh diagram for infinite life), as well as uniaxial and multi-axial fatigue methods, are also welcome.

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Metallurgy and Metallurgical Engineering*) / CiteScore - Q1 (Metals and Alloys)
