

Development and Application of Microscale Metallic Fibers

Guest Editor:

Prof. Dr. Jingshun Liu

School of Materials Science and
Engineering, Inner Mongolia
University of Technology,
Hohhot, China

Deadline for manuscript
submissions:

closed (31 July 2022)

Message from the Guest Editor

Dear Colleagues,

In this Special Issue, we strongly invite you to contribute your articles that focus on the latest research progress related to preparation methods including liquid-forming technology, microstructural characterization, magnetic and mechanical properties, and some interesting physical effects of microscale metallic fibers, as well as to demonstrate the innovative multi-functional devices and potential sensor applications of advanced metallic microwires.

Prof. Dr. Jingshun Liu

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Metallurgy and Metallurgical Engineering*) / CiteScore - Q1 (Metals and Alloys)
