# Non-Destructive Evaluation (NDE) for Aging Industrial Plant and Infrastructure

Guest Editor

## Dr. Naoya Kasai

Graduate School of Environment and Information Sciences, Yokohama National University, Yokohama, Japan

Deadline for manuscript submissions:

closed (30 November 2020)

# **Message from the Guest Editor**

To make a decision about proper maintenance for aging facilities in plants and aging components of infrastructure, the NDE method is a key technology, since it provides important information regarding their material damage, such as the length and the depth of corrosion and cracks. In addition, it is important to marry proper maintenance with reduced cost, including that of the NDE method.

The aim of this Special Issue is to present the advanced and innovative NDE methods, including through theoretical and experimental studies, and contribute to making a decision for the proper maintenance of aging facilities in industrial plants and aging components of infrastructure. We expect contributions to the Special Issue from scholars and researchers all over the world both in the academic and industrial fields

# **Editors-in-Chief**

#### Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

### Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

# **Message from the Editorial Board**

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure - disciplines in metallurgical field the ranging from processing. and mechanical behavior. phase transitions microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

## **Author Benefits**

**Open Access:** free for readers, with <u>article processing charges (APC)</u> paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science),

Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Metallurgy and Metallurgical Engineering*) / CiteScore - Q1

(Metals and Alloys)
