

## Thin Film Solar Cell Based on Perovskite

Guest Editor:

**Prof. Hajime Shirai**

Graduate School of Science and  
Engineering, Saitama University,  
Saitama, Japan

Deadline for manuscript  
submissions:

**closed (31 July 2021)**

### Message from the Guest Editor

Dear Colleagues,

Solution-processed crystalline Si/perovskite tandem structure solar cells using FACsPBI3 perovskites and c-Si/PEDOT:PSS heterojunction solar cells as a top and bottom cell are discussed via solution chemistry.

The aim of this Special Issue is to present the latest achievements of perovskite and its applications in thin film solar cells. It is my pleasure to invite all researchers working on perovskite and solar cells to submit a manuscript in the field for this Special Issue.

Prof. Hajime Shirai

## Message from the Editor-in-Chief

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Metals and Alloys)
