

## Friction Stir Welding and Processing in Alloy Manufacturing

Guest Editor:

**Prof. Dr. Carlos Agelet de Saracibar**

Department of Civil and Environmental Engineering, Technical University of Catalonia, UPC BarcelonaTech, 08034 Barcelona, Spain

Deadline for manuscript submissions:

**closed (31 January 2019)**

### Message from the Guest Editor

The computational modeling and numerical simulation of friction stir welding processes has been a very active field of research in the last few decades. Significant advances in this field have been achieved as a result of interdisciplinary research on related fields of computational mechanics, constitutive modeling, materials characterization, mathematical analysis, and numerical methods. On the other hand, also during this period, industry has shown a growing interest in incorporating numerical techniques as a valuable tool for design and process optimization.

This Special Issue on “Friction Stir Welding and Processing in Alloy Manufacturing” intends to collect the last developments in the field, written by well-known researchers who have contributed significantly in the computational modeling, numerical simulation, or material characterization of friction stir welding processes in alloy manufacturing.

Topics addressed in this Special Issue may include, but are not limited to:

- Computational modelling and numerical simulation
- Thermomechanical formulation
- Material properties
- Metallurgical characterization
- Numerical methods
- Industrial applications

Prof. Carlos Agelet de Saracibar

## Editor-in-Chief

### Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

## Message from the Editor-in-Chief

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Metals and Alloys)
