

Special Issue

Modeling Thermodynamic Systems and Optimizing Metallurgical Processes

Message from the Guest Editor

In this Special Issue, articles that focus on the development of a database for thermodynamic and thermophysical properties, advanced methods for database development, applications of thermodynamics and/or kinetics in metallurgical, and material process design are highly sought after. Therefore, this Special Issue will cover, but is not limited to, the following fundamental and applied research topics:

Thermodynamic modeling for metallic and oxide systems; Diffusion modeling for metallic and oxide systems; Viscosity modeling for slag and liquid metal; Machine learning on thermodynamic modeling; Phase diagram measurements; Diffusion measurements; Thermodynamic property measurements; Thermodynamic calculations; Solidification; Metal extraction; Metal refinement; Recycling; Metallurgical process simulation; Material process simulation; Material design; Corrosion.

About the Journal

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Editors-in-Chief

Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Metals and Alloys)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2024).
