Deadline for manuscript submissions:
closed (30 March 2024)

Message from the Guest Editor

Dear Colleagues,

As we know, thin-film transistors (TFTs) are essential components in various electronic devices, such as displays, sensors, and memory devices, due to their high performance, low power consumption, and flexibility.

This issue would cover a wide range of topics related to TFTs, including TFT materials, TFT fabrication techniques, TFT device architectures, TFT characterization methods, TFT device reliability and TFT-based applications in various fields. The special issue will highlight the importance of collaboration among researchers from different disciplines, including materials science, electrical engineering, and physics, to overcome the technical barriers and bring TFTs to real-world applications.

Overall, this special issue will provide a comprehensive overview of the current state-of-the-art in the field of TFTs and highlights the exciting opportunities and challenges in this rapidly evolving field. The papers presented in this special issue are expected to stimulate further research and innovation in the field of TFTs and pave the way for future electronic applications. You are more than welcome to submit high quality review or original research papers.

2. School of Electrical and Electronic Engineering, Nanyang Technological University, Singapore 639798, Singapore

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.
Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Mechanical Engineering*)
