31 December 2024

Message from the Guest Editors

Dear Colleagues,

Surface acoustic wave and bulk acoustic wave devices have always been a hotspot in the field of piezoelectric devices. Commercially, the demand for high-frequency, large-bandwidth, and low-loss filters in the RF front-end of mobile phones continues to drive the development of surface and bulk acoustic wave devices. Various high-sensitivity acoustic wave sensors are also attracting the attention of researchers and investors. At the same time, with the continuous improvement of the basic research, some new devices are also emerging, such as the surface acoustic wave amplifier based on the acousto-electric amplification effect, and the XSAW/XBAW devices based on the single crystal piezoelectric substrate. It is worth noting that sensors based on single-crystal piezoelectric thin-film substrates have not been studied much, which is undoubtedly an important topic in this field. Accordingly, this Special Issue seeks to showcase research papers, communications, and review articles that focus on novel methodology, design and fabrication developments in surface and bulk acoustic wave devices, including, but not limited to, the topics mentioned above.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Mechanical Engineering*)
