Message from the Guest Editors

Dear Colleagues,

Precision optical elements have always been essential to strategic fields such as aerospace, defense, medical equipment, and electronics. In recent years, the development of those fields has created new requirements for optical manufacturing technology, which mainly focus on higher precision, efficiency, complexity, and intelligence. Therefore, developing new advanced micro/nanoscale machining technologies, state-of-the-art processing techniques, and corresponding equipment and establishing theoretical systems for better understanding and application of the process are of great significance. Accordingly, this Special Issue seeks to showcase research papers, short communications, and review articles that focus on, but are not limited to, the recent advances and frontiers of the following areas:

1. Precision engineering, inspection, measurement, and metrology;
2. Manufacturing planning, optimization, and simulation;
3. Computer-integrated manufacturing systems;
4. Smart manufacturing;
5. Micro/nanofabrication and manufacturing;
6. Ultraprecision machining technology.

We look forward to receiving your contributions.

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Mechanical Engineering*)
