Organic Bioelectronics for Bioengineering Application

Guest Editors:

Dr. Keying Guo

Biological and Environmental Science and Engineering Division, King Abdullah University of Science and Technology (KAUST), Thuwal 23955, Saudi Arabia

Dr. Anil Köklü

Biological and Environmental Science and Engineering Division, King Abdullah University of Science and Technology (KAUST), Thuwal 23955, Saudi Arabia

Dr. Cheng Jiang

The School of Medicine, Life and Health Sciences (MED|LHS), The Chinese University of Hong Kong, Shenzhen, Shenzhen 518172, China

Deadline for manuscript submissions: closed (28 February 2023)

Message from the Guest Editors

Organic bioelectronics-enabled smart devices have shown their potential to tackle critical challenges in bioengineering applications associated with disease diagnostics, food safety, agriculture, and environmental monitoring. This Special Issue aims to introduce cutting-edge research activities in organic bioelectronics, revealing the open challenges for building next-generation bioelectronic devices. The Special Issue welcomes original and review articles, which will present current high-impact research topics as well as future perspectives in bioelectronics.

Key topics include, but are not limited to, the following: 1) organic bioelectronic device and system design, 2) smart biosensors and bioelectronic systems, 3) wearable and implantable bioelectronics, 4) self-powered and integrated bioelectronics, 5) lab-on-a-chip microsystems, 6) biomedical signal processing of bioelectronics, 7) in vitro or in vivo monitoring systems for biological signals, and 8) machine learning for smart bioelectronics.

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

 $\textbf{High Visibility:} \ indexed \ within \ Scopus, \ SCIE \ (Web \ of \ Science), \ PubMed,$

PMC, Ei Compendex, dblp, and other databases.

Journal Rank: JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Mechanical Engineering)
