Ferroelectric Micro and Nano Sensors

Guest Editor:

Dr. Antonino S. Fiorillo
BATS Laboratory, Department of Health Sciences, University Magna Graecia of Catanzaro, Catanzaro, Italy

Deadline for manuscript submissions:
closed (10 December 2020)

Message from the Guest Editor

Dear Colleagues,

Due to their broad field of application, especially that of bio-inspired sensors and systems, ferroelectric micro and nanosensors represent an area of intense research. Mechanical and thermal energy transducers for applications at low, medium, and high ultrasonic frequencies (piezoelectric effect) and infrared (pyroelectric effect) have been employed in multiple contexts, with an ever-growing literature over the years. At the same time, during the last decade, the technology of polymeric miniaturized sensors has allowed the development of a long list of technological possibilities, leading to one of the fastest-growing markets. One of the most interesting applications concerns the development of sensors aimed at emulating the sophisticated and evolved sensorial systems already present in nature (e.g., biosonar system, tactile sensors). Accordingly, this Special Issue seeks to showcase research papers, short communications, and review articles that focus on novel methodological developments in the field of ferroelectric materials for the fabrication of micro and nanosensors and the related electronic interfaces.

Editor-in-Chief

Prof. Dr. Ai-Qun Liu
1. Department of Electrical and Electronic Engineering, The Hong Kong Polytechnic University, Hong Kong, China
2. School of Electrical and Electronic Engineering, Nanyang Technological University, Singapore 639798, Singapore

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.
Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Mechanical Engineering*)
