### Message from the Guest Editors

Dear Colleagues,

Microreactor technology is gaining ground in a broad range of applications, including biotechnology, chemical synthesis, green chemistry, and synthesis of functionalized materials. However, issues are sometimes encountered when running micro-reactors, such as clogging and the necessity of harnessing instabilities. In all of these fields, Artificial Intelligence has started to pop up to aid the development of both processes and products. These challenges represent a great opportunity to develop innovations and to bring micro-reaction engineering into a new era.

The Special Issue will encompass original articles and reviews broadly dedicated to flow chemistry at the micro-scale therein highlighting issues, current state-of-the-art technology and opportunities for development. The contributions will include experimental and theoretical research devoted but not limited to the following: chemical synthesis, artificial intelligence, clogging, multiphase flows, crystallization, spectroscopy, imaging, and automated flow chemistry.

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Ai-Qun Liu

1. Department of Electrical and Electronic Engineering, The Hong Kong Polytechnic University, Hong Kong, China  
2. School of Electrical and Electronic Engineering, Nanyang Technological University, Singapore 639798, Singapore

## Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

**Journal Rank:** JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Mechanical Engineering*)
